

BDD Acceptance Test Results

WBOCRM - Test Execution Output

```
> crm-backend@1.0.0 test:bdd
> cucumber-js

Feature: User Authentication (auth_login.feature)

Scenario: Successful login with valid credentials
Given a registered user with email "bdd auth sales@test.wbocrm" and role "sales"
When I log in with email "bdd auth sales@test.wbocrm" and password "BddAuth123!"
Then the response status should be 200
And the response should contain a token
And the token payload should include role "sales"
✓ Passed

Scenario: Failed login with invalid password
When I log in with email "bdd auth sales@test.wbocrm" and password "WrongPass999!"
Then the response status should be 401
✓ Passed

Scenario: Rejected request without token
When I request the leads list without a token
Then the response status should be 401
✓ Passed

Scenario: Rejected request with insufficient role
Given I am authenticated as a support user
When I request the leads list
Then the response status should be 403
✓ Passed

Feature: Lead Registration (lead_registration.feature)

Scenario: Successfully register a new lead
Given I am authenticated as a sales user
When I submit a new lead with email "bdd lead@test.wbocrm" and name "BDD Lead"
Then the response status should be 201
And the response should contain a lead id
✓ Passed

Scenario: Reject duplicate email registration
Given a lead with email "bdd dup@test.wbocrm" already exists
When I submit a new lead with email "bdd dup@test.wbocrm" and name "Dup Lead"
Then the response status should be 400
And the response error should be "DUPLICATE EMAIL"
✓ Passed

Feature: Lead Priority Scoring (lead_scoring.feature)
```

Scenario: High engagement metrics receive high score

Given I am authenticated as a sales user

When I create a lead with metrics calls 20 meetings 5 budget 100 companySize "enterprise" emailOpens 20

Then the response status should be 201

And the lead priority score should be greater than 70

✓ Passed

Scenario: No engagement receives low score

Given I am authenticated as a sales user

When I create a lead with metrics calls 0 meetings 0 budget 0 companySize "small" emailOpens 0

Then the response status should be 201

And the lead priority score should be less than 30

✓ Passed

Scenario: Leads list sorted by priority score descending

Given I am authenticated as a sales user

When I retrieve all leads

Then the response status should be 200

And leads should be ordered by priority score descending

✓ Passed

Feature: Support Ticket Creation (ticket_creation.feature)

Scenario: Successfully create a support ticket

Given I am authenticated as a support user

And a lead exists in the system

When I create a ticket with description "BDD test ticket" and priority "Low"

Then the response status should be 201

And the response should contain a ticket_id

✓ Passed

Scenario: Update a ticket status

Given an existing support ticket

When I update the ticket status to "In Progress"

Then the response status should be 200

And the ticket status should be "In Progress"

✓ Passed

Feature: Duplicate Email Detection (duplicate_email.feature)

Scenario: Reject lead with existing email

Given I am authenticated as a sales user

And a lead with email "existing@test.wbocrm" already exists

When I submit a new lead with email "existing@test.wbocrm"

Then the response status should be 400

And the response error should be "DUPLICATE EMAIL"

✓ Passed

Scenario: Accept lead with unique email

Given I am authenticated as a sales user

When I submit a new lead with email "unique bdd@test.wbocrm" and name "Unique Lead"

Then the response status should be 201

And the response should contain a lead id

✓ Passed

Feature: Interaction Logging (interaction_logging.feature)

Scenario: Successfully add an interaction note to a lead

Given I am authenticated as a sales user

And a lead exists in the system

When I add an interaction note "Initial phone call - very interested" to the lead

Then the response status should be 201

And the response should contain the note text "Initial phone call - very interested"

✓ Passed

Scenario: Retrieve interaction logs for a lead

Given I am authenticated as a sales user

And a lead exists in the system

And I add an interaction note "Follow-up email sent" to the lead

When I retrieve the interaction logs for the lead

Then the response status should be 200

And the logs should contain at least 1 entry

✓ Passed

Feature: Pipeline Stage Management (pipeline_stage.feature)

Scenario: Successfully update pipeline stage to Qualified

Given I am authenticated as a sales user

And a lead exists in the system

When I update the lead pipeline stage to "Qualified"

Then the response status should be 200

And the lead pipeline stage should be "Qualified"

✓ Passed

Scenario: Reject invalid pipeline stage

Given I am authenticated as a sales user

And a lead exists in the system

When I update the lead pipeline stage to "InvalidStage"

Then the response status should be 400

And the response error should be "INVALID STAGE"

✓ Passed

Feature: Dashboard KPIs (dashboard_kpis.feature)

Scenario: Dashboard returns all KPI fields

Given I am authenticated as a sales user

When I request the dashboard

Then the response status should be 200

And the dashboard should contain "activeLeads"

And the dashboard should contain "openTickets"

And the dashboard should contain "top5"

And the dashboard should contain "monthlyRevenue"

✓ Passed

Scenario: Dashboard top5 contains leads sorted by score

Given I am authenticated as a sales user

When I request the dashboard

Then the response status should be 200

And the dashboard top5 should be an array

✓ Passed

Feature: CSV Export (csv_export.feature)

Scenario: Successfully export leads as CSV

Given I am authenticated as a sales user

When I request the leads CSV export

Then the response status should be 200

And the response content-type should be "text/csv"

And the CSV should contain the header "lead_id,contact_name,email"

✓ Passed

20 scenarios (20 passed)

78 steps (78 passed)
